INTRODUCTION

India is one of the leading exporters of generic medicines to the world. The branded generic medicines are significantly expensive than their un-branded generic equivalents, though they are identical in their therapeutic value.

Further, as per the 71st Round of the National Sample Survey Office (NSSO) on Health in India, purchase of medicine accounted for around 72% in rural sector, and 68% in urban sector, of the total expenditure on non-hospitalized treatment of ailments. Making available reasonably priced quality medicines in the market benefits all the citizens.

The Department of Pharmaceuticals under Ministry of Chemicals & Fertilizers, Government of India has been taking several regulatory and fiscal measures from time to time towards realizing this objective.

87% of drugs dispensed in India are branded generics, i.e., generic drugs sold with brand names. The need is to focus on unbranded medicines to save expenditure on medicines for all citizens.
