Harmonizing Body & Mind, *Celebration of*

## International Day of Yoga 2025

Head Office, New Delhi

Karnal, Haryana

Raipur, Chhattisgarh

Chennai, Tamil Nadu

With the theme

**"Yoga for One Earth, One Health"**, PMBI marked the celebration of the 11<sup>th</sup> International Yoga Day across the nation. All stakeholders of the PMBI, with more than 9000 participants, including the common citizens, beneficiaries, Jan Aushadhi Kendra owners, Jan Aushadhi Mitras, healthcare professionals, and other stakeholders, participated actively and immersed themselves in the practice of Yoga. A special virtual desk yoga session of the PMBI officials also held on 20<sup>th</sup> June '25 at the HQ, New Delhi, under the guidance of a trained Yoga instructor. The employees engaged in different yogic postures, suiting the interests of the office goers. Janaushadhi has reinforced the faith of the common people in harmonizing the internal and external healing through Yoga and spiritual wellness.

## Visit of Delegates from 24 Countries from the

### 2<sup>nd</sup> Policymakers' Forum

at JAK, Agra, U.P

The delegates from 24 countries in the Global South visited the Pradhan Mantri Bhartiya Janaushadhi Kendra (PMBJK) at Agra, Uttar Pradesh, as part of the 2<sup>nd</sup> Policymakers' Forum, hosted by the Indian Pharmacopeia Commission in association with the Ministry of External Affairs, Government of India. The delegation included representatives from nations interested in knowing and implementing the Pariyojana in their respective countries. The delegates were informed about the Jan Aushadhi Kendras and their functionality under the Pariyojana, which offer generic medicines that are equivalent in quality and efficacy to branded drugs but at a fraction of the cost. Further, it was also discussed how the initiative reduces the financial burden of healthcare on ordinary citizens. Many delegates expressed keen interest in exploring how the model could be adapted to suit the healthcare systems and economic contexts of their own countries.

## MY Bharat ELP Programme

at

**Jan Aushadhi Kendras** thrives across India,  
Empowering Youth with entrepreneurial experience

The Experiential Learning Programme (ELP) under the Mera Yuva Bharat (MY Bharat) initiative is making remarkable progress across India, empowering young volunteers and enhancing healthcare accessibility in various cities. In Siwan, Bihar, MYBharat volunteers have been actively engaged in the Jan Aushadhi ELP, gaining hands-on experience at local Kendras and raising awareness with informative pamphlets alongside healthcare professionals. Similarly, in Delhi and Jammu, volunteers are learning about medicine distribution and community outreach, building trust and skills while bridging gaps between healthcare providers and the public. Also, in other states, many such engaging and motivating activities are gaining the attention of people, which proves that Janaushadhi has made a wonderful impact in society and is making healthcare accessible to all. These efforts reflect the program's success in fostering a new generation of leaders committed to public health.

## Exhibitions/Trade Fairs

The Pradhan Mantri Bhartiya Janaushadhi Pariyojana (PMBJP) has been expanding its reach, with recent activities including the participation at "Vision Karnataka 2025" & "Amravati Fest Exhibition"

### Vision Karnataka 2025

The PMBJP's presence at events like "Vision Karnataka 2025" in Belagavi highlights its growing influence and collaboration with other sectors, aiming to increase awareness and usage of Janaushadhi medicines. The event took place from 11th June to 13th June 2025 at KLE Centenary Convention Center, Belagavi.

### Amravati Fest Exhibition

The Pradhan Mantri Bhartiya Janaushadhi Pariyojana (PMBJP) stall at the "Amravati Fest Exhibition", held from June 26 to June 29, 2025, at the Science Core Ground in Amravati, Maharashtra, was a significant event aimed at promoting affordable healthcare solutions to the public. This exhibition, a vibrant platform for various sectors, provided PMBJP with an opportunity to showcase its affordable medicines accessible at low costs.

## Health Boost For Delhi: 33 Arogya Mandirs And 17 Jan Aushadhi Kendras Inaugurated

**New Delhi:** In a major boost to Delhi's healthcare infrastructure, a total of 33 Urban Ayushman Arogya Mandirs (Health and Wellness Centers) and 17 Jan Aushadhi Kendras were inaugurated in the capital on Tuesday. The multiple healthcare centres that will give a new identity to city's healthcare landscape were inaugurated by Chief Minister Rekha Gupta, ministers in Delhi government as well as BJP Parliamentarians.

CM Rekha Gupta, speaking at the inauguration ceremony, said, "Today, under a special initiative envisioned by our Prime Minister Narendra Modi ji, I had the opportunity to inaugurate an Arogya Mandir (Health and Wellness Center) here. Across Delhi, 33 Arogya Mandirs and 17 Jan Aushadhi Kendras are being inaugurated simultaneously today. I would like to proudly inform the residents that our ministers, MPs, and MLAs are inaugurating these centres at multiple locations."

The Ayushman Arogya Mandirs, equipped with modern health equipments, will provide a wide array of services and seek to serve as one-stop centre for all types of medical assistance.

## जन औषधि योजना के जेनेटिक दवाइयों ने बदल दिया भारत का बाजार

भारत में स्थानीय देखभाल के खर्चों को लेकर आम जनता अक्षय चिंतित रहती है। यही कारण है कि भारत सरकार ने जन औषधि योजना (Jan Aushadhi Yojana) शुरू की, जो सस्ती और गुणवत्ता वाली दवाइयों का एक प्रभावी विकल्प प्रदान करती है। इस योजना ने लाखों लोगों को वह दवाइयां उपलब्ध कराई हैं, जो वे ब्रांडेड दवाइयों की तुलना में बहुत सस्ती कीमत पर प्राप्त कर सकते हैं। बड़ी बात ये है कि धीरे-धीरे लोग जेनेटिक दवाओं को अपनाने लगे हैं।

## AB-PMJAY, Jan Aushadhi Kendras boosting healthcare for middle class in last 11 years

**New Delhi:** Flagship scheme like the Ayushman Bharat-Pradhan Mantri Jan Arogya Yojana (AB-PMJAY) and the Jan Aushadhi Kendras under the Pradhan Mantri Bhartiya Janaushadhi Pariyojana (PMBJP) has significantly enhanced healthcare for middle class in the last 11 years, according to an official statement issued on Thursday.

"Healthcare in India has seen a quiet but far-reaching shift in the last eleven years. Through a blend of targeted public schemes and digital reach, the Government has made quality healthcare both affordable and accessible for millions, especially the middle class," the statement said.

Further, with the number of Jan Aushadhi Kendras rising to 16,469, as of May 30, from just 80 in 2014, the PMBJP brought essential medicines within reach of the common citizen.

## Lucknow News: जन औषधि केंद्रों पर अब पहले से भी सस्ती मिल रहीं दवाएं

**लखनऊ:** सरकारी अस्पतालों में खुले जन औषधि केंद्रों पर अब पहले से भी सस्ती दर पर दवाएं मिल रही हैं। कई जेनेटिक दवाओं के दाम कम हुए हैं, जो पहले महंगी हुआ करती थीं। इनमें बीपी-शुगर व मस्तिष्क से जुड़ी कई दवाएं हैं, केंद्र प्रभागियों का कहना है कि दवाओं की नई खेप आने वाले दाम कम हुए हैं। इसका फायदा मरीजों को मिल रहा है।

शहर के 11 सरकारी अस्पतालों में जन औषधि केंद्र का संचालन हो रहा है। नए टेंट के बाद कंपनी ने लाइसेंस नहीं दिया था। पुराने लाइसेंस पर सभी केंद्र खुल गए थे। इस विभाग ने आपति लगाते हुए सभी केंद्र फ़शवरी में बंद करवा दिया थे। ऐसे में अस्पतालों की ओपीडी में आने वाले मरीज बिना दवालिए लौट रहे थे।

मार्च के आखिरी हफ्ते में अस्पतालों को इस लाइसेंस मिला था, जिसके बाद सभी केंद्र खुले। अस्पतालों में खुले जन औषधि केंद्र में अब तीन से अधिक दवाएं हैं। जन औषधि केंद्र के प्रभागियों का कहना है बीपी-शुगर व मस्तिष्क दोगे से जुड़ी कई दवाओं के दामों में कमी आई है। पहले से 10 से 15 फीसदी सस्ती दर पर दवाएं मरीजों को मिल रही हैं।

जन औषधि केंद्र के प्रभागी ने बताया कई जेनेटिक दवाएं पेटेंट होती हैं। जब इन दवाओं से पेटेंट हटता है तो दवाएं सस्ती हो जाती हैं। पेटेंट दवाओं पर कमीशन 80 से 90 फीसदी होता है। पेटेंट हटने वाले दवाएं दवाएं आधे से कम दाम पर आ जाती हैं।

## Slashing Drug Costs: Jan Aushadhi's Scheme Having A Deep Impact

Spiralling healthcare costs are driving a growing number of patients to opt for low-cost generics — a shift made possible by the government's Jan Aushadhi scheme, which offers an affordable alternative to expensive branded medicines.

According to reports, generic medicines in Jan Aushadhi stores are 50–80% cheaper than branded alternatives, giving patients a cost-effective choice for treatment.

For the unversed, medicines can be sub-divided into three categories: generic drugs, branded generics and branded drugs. A generic drug is sold under its chemical name rather than under a specific brand name. Branded generics contain the same active ingredient as generics (and tend to be much costlier) but are marketed under their own trademarks. Branded drugs are typically under patent protection and thus significantly more expensive.

Generic medicines, in contrast, sold through the government's Jan Aushadhi scheme, offer steep savings compared to average market rates.

## MP: Saving money on medicines, say Jan Aushadhi scheme beneficiaries in Neemuch

**Neemuch (Madhya Pradesh), (IANS)** The Jan Aushadhi Kendras, launched under the ambitious Pradhan Mantri Bharatiya Janaushadhi Pariyojana (PMBJP), have come as a blessing for the poor and middle-class families across the country, as they are getting quality medicines at reasonable rates - something which didn't exist before.

PMBJP beneficiaries in Neemuch of Madhya Pradesh are also a happy lot, as thousands of villagers benefit from the public welfare scheme. Many villagers, sharing their joy, said that now good medicines are available at cheaper rates, and they are also saving money on their medical bills.

"There is a discount of 10 to 70 per cent on medicines, there is huge saving in expenditure on medicines," shared most of the beneficiaries, talking to IANS.

They expressed gratitude to PM Modi for the Jan Aushadhi Kendra scheme.

## Odisha: Jan Ausadhi Kendra of Lathikata LAMPSC, a hit

In line with Prime Minister Narendra Modi's vision of 'Sahkar se Samriddhi' (Prosperity through Cooperation), the Lathikata LAMPSC in Sundargarh, Odisha, launched a Jan Aushadhi Kendra on 31st January 2025, under the Pradhan Mantri Bhartiya Janaushadhi Pariyojana (PMBJP) with the support of the Ministry of Cooperation.

In just 100 days, the centre has made a remarkable impact by providing affordable medicines to over 2,400 patients, including senior citizens and economically weaker individuals. The initiative has led to savings of up to 90% on essential medicines for the local population.

The centre also offers women's hygiene products at highly subsidized rates, ensuring access to health and dignity for all. Beyond healthcare, the Jan Aushadhi Kendra has become a model of rural economic empowerment.

The centre also offers women's hygiene products at highly subsidized rates, ensuring access to health and dignity for all. Beyond healthcare, the Jan Aushadhi Kendra has become a model of rural economic empowerment.

The cooperative now earns a stable monthly income of Rs 25,000–Rs 30,000, strengthening its financial foundation.

## Understanding Typhoid: Causes, Symptoms, and Prevention

Typhoid fever is a bacterial infection that remains a significant public health concern in many parts of the world, particularly in areas with limited access to clean water and sanitation. Caused by the bacterium *Salmonella Typhi*, typhoid spreads through contaminated food and water, making awareness and preventive measures critical. This article explores the causes, symptoms, treatment, and prevention strategies for typhoid fever to help our readers stay informed and safe.

### What Causes Typhoid?

Typhoid fever is primarily caused by *Salmonella Typhi*, a bacterium transmitted through the ingestion of contaminated food or water. The bacteria can spread in environments where hygiene practices are inadequate, such as:

- Contaminated water sources:** Drinking water contaminated with sewage.
- Poor food handling:** Food prepared in unsanitary conditions or by infected individuals.
- Close contact:** Rarely, direct contact with an infected person can spread the bacteria.

In some cases, individuals who recover from typhoid may become asymptomatic carriers, unknowingly spreading the bacteria through their feces, which can contaminate food or water sources.

### Symptoms to Watch For

Typhoid symptoms typically develop 6 to 30 days after exposure to the bacteria. The illness often progresses gradually, with symptoms including:

#### Fever:

A sustained high fever, often rising to 103–104°F (39–40°C).

#### Fatigue and weakness:

Feeling unusually tired or lethargic.

#### Abdominal pain:

Discomfort or tenderness in the stomach area.

#### Loss of appetite:

Reduced desire to eat, sometimes accompanied by weight loss.

#### Headache and muscle aches:

General body pain and discomfort.

#### Constipation or diarrhoea:

Constipation is more common in adults, while diarrhoea is frequent in children.

#### Rose spots:

Small, pink rashes on the chest or abdomen in some cases.

If untreated, typhoid can lead to serious complications, such as intestinal perforation or bleeding, which can be life-threatening. Early diagnosis and treatment are crucial.

### Diagnosis and Treatment

Typhoid is diagnosed through clinical evaluation and laboratory tests, such as blood, stool, or bone marrow cultures, to detect *Salmonella Typhi*. Once confirmed, treatment typically involves:

- Antibiotics:** Commonly prescribed antibiotics include ciprofloxacin, azithromycin, or ceftriaxone. However, antibiotic resistance is a growing concern, so doctors may need to tailor treatment based on local resistance patterns.
- Supportive care:** Hydration and electrolyte balance are essential, especially for patients with severe diarrhoea or fever.

With prompt treatment, most people recover within 7–10 days, though full recovery may take longer if complications arise. Always consult a healthcare professional for proper diagnosis and treatment.

## Prevention: Your Best Defence

Preventing typhoid fever relies on a combination of personal hygiene, safe food and water practices, and vaccination. Here are key preventive measures:

- **Safe drinking water:** Always drink boiled, bottled, or treated water, especially when traveling to high-risk areas.
- **Food safety:** Eat thoroughly cooked food, avoid raw or undercooked items, and peel fruits and vegetables yourself.
- **Hand hygiene:** Wash hands thoroughly with soap before eating or preparing food and after using the bathroom.
- **Vaccination:** Two types of typhoid vaccines—oral and injectable—are available and recommended for travellers to endemic areas. Consult your doctor for vaccination schedules, as protection is not 100% and booster doses may be needed.
- **Sanitation improvements:** Support community efforts to improve water quality and sanitation infrastructure.

## Takeaway

Typhoid fever is a serious but preventable illness. By prioritizing safe water, proper food handling, and good hygiene practices, you can significantly reduce your risk. If you're traveling to an area where typhoid is common, consider vaccination and stay cautious about what you eat and drink. If you suspect typhoid symptoms, seek medical attention promptly. Together, we can work toward a world where typhoid is no longer a threat.
